conspiracy theories. He is unwell and in possession of many weapons. He goes by any combination of Karactus James Blome on Facebook, his “company” page on which he constructs chemical weapons is Blome Waffenkreationen – BWk. All are searchable and a lot of content is public. ”

**Criminal Background:**

Blome shows one prior arrest in Illinois for Aggravated Assault with a Deadly Weapon with no conviction in 01/23/16. I spoke with an investigator in Illinois who is working on getting recent reports involving Blome. It sounds like Blome attempt to stab his father with a knife in that incident.

**Disposition:**

I reviewed posts on Social Media. Blome has an extremely Anti-Government viewpoint. He claims to be an Anarchist and has numerous Anarchy symbols. Most of his posts are Anti-Government/Anti-Police. His motto is "Taxation is Theft". He believes in various Conspiracy Theories related to the Government (ie 9/11 was a hoax). He is pro 2<sup>nd</sup> Amendment.

He also has several posts indicating he is not pleased with CPS. He focuses on Pedophilia. He is against Pedophilia however never posts any specific details about an event that may have happened to him in the past.

Although Blome has strong political views, he does not make specific threats. In general, most of his posts are non-violent in nature. He frequently re-posts Memes created by others.

He also posts about the country of Germany but does not appear to have any White Supremacist views. He has German Military Clothing and some old helmets. He is wearing an armor plate carrier in one photo. I have not seen firearms. He has some knives that appear to be collectible old military knives.

Blome posts some videos related to chemical experiments. He appears to perform several experiments with Sulfuric Acid. A lot of the videos are of him burning various chemicals in the woods.

He is selling what he describes as a homemade self-defense weapon, the "XW-M2 Saurewerfer". He sells the device for \$10 (minus the Sulfuric Acid). The device is basically a syringe (no sharp) that is duct taped to a cutoff 2 Liter Bottle top. He draws Sulfuric Acid into the syringe then demonstrates that you can spray the Acid out causing Acid burns. He does a demonstration in one video on pavement and on a T-Shirt. The device squirts small amounts of Sulfuric Acid about 5-10 feet. He makes no threats with this weapon.

I have not seen any posts with an actual Flame thrower. He posts videos of himself spraying Axe Body Spray on a lighter causing a bigger flame.

He also posts several videos of him playing the violin and rapping.

Overall, Blome has strong political views but does not make any threats and the majority of his posts are non-violent in nature. He posts daily and is very vocal about the 2<sup>nd</sup> amendment but has not posted pictures of any firearms. He has access to knives and some old military memorabilia. His "chemical weapons" are simplistic and can be obtained at various locations open to the public. He does not have an actual flamethrower. He burns various materials but is not constructing explosives.

At this point, based on his extreme views against the Government and Police, no home visit was conducted. Additionally, I did not observe any criminal laws violated at this time. This information is being forwarded to the Fusion Center.
